

# Instructions on how to connect to the UMC unsecured wireless network using Windows XP

Please make sure that your wireless card is enabled and functioning. If you know that your wireless card is working correctly please do the following:

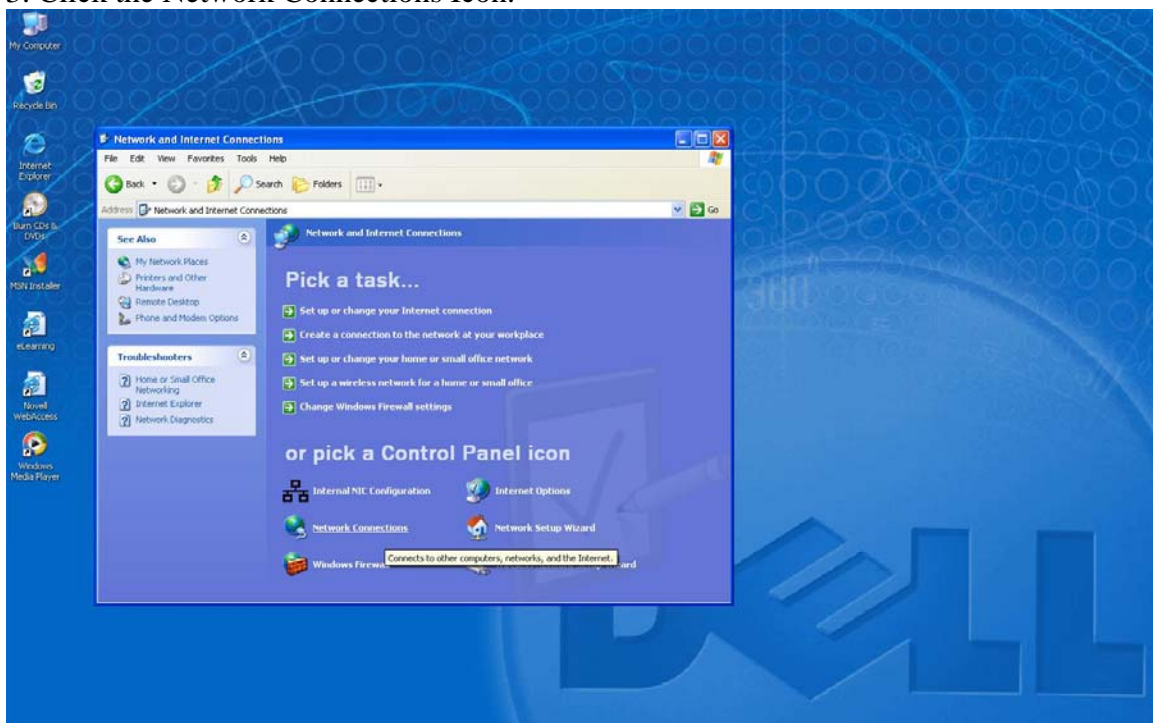

1. Click the start button and click the Control Panel icon.

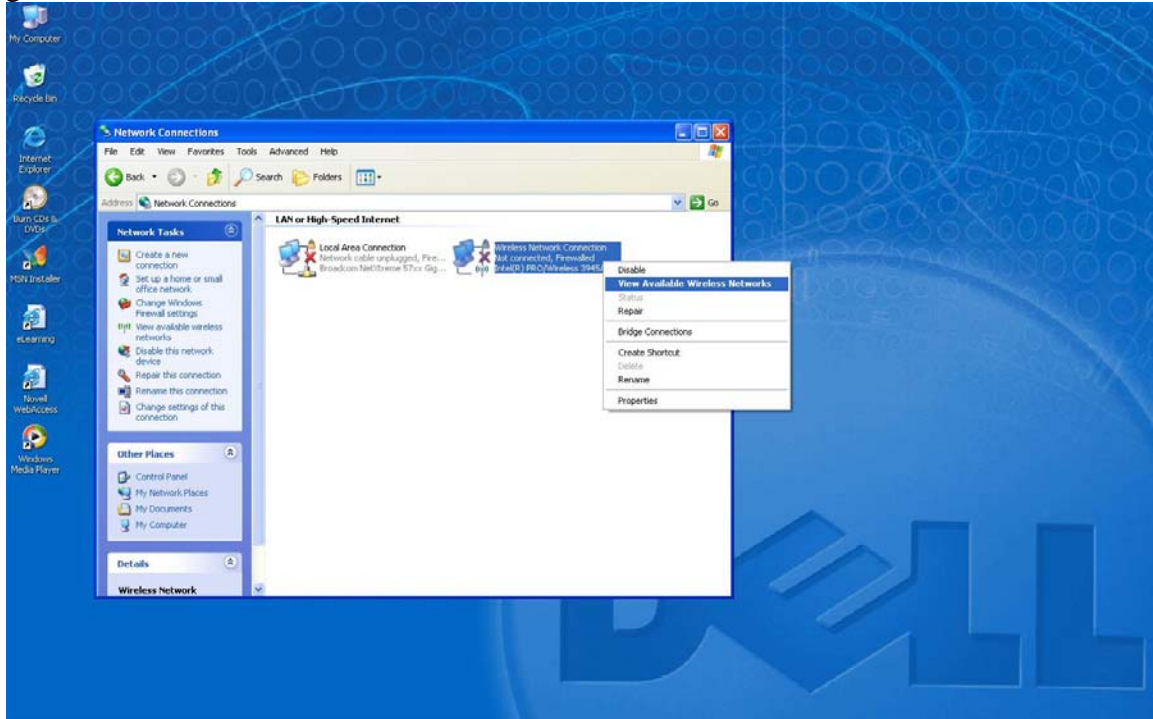

2. Click the Network and Internet Connections Icon.

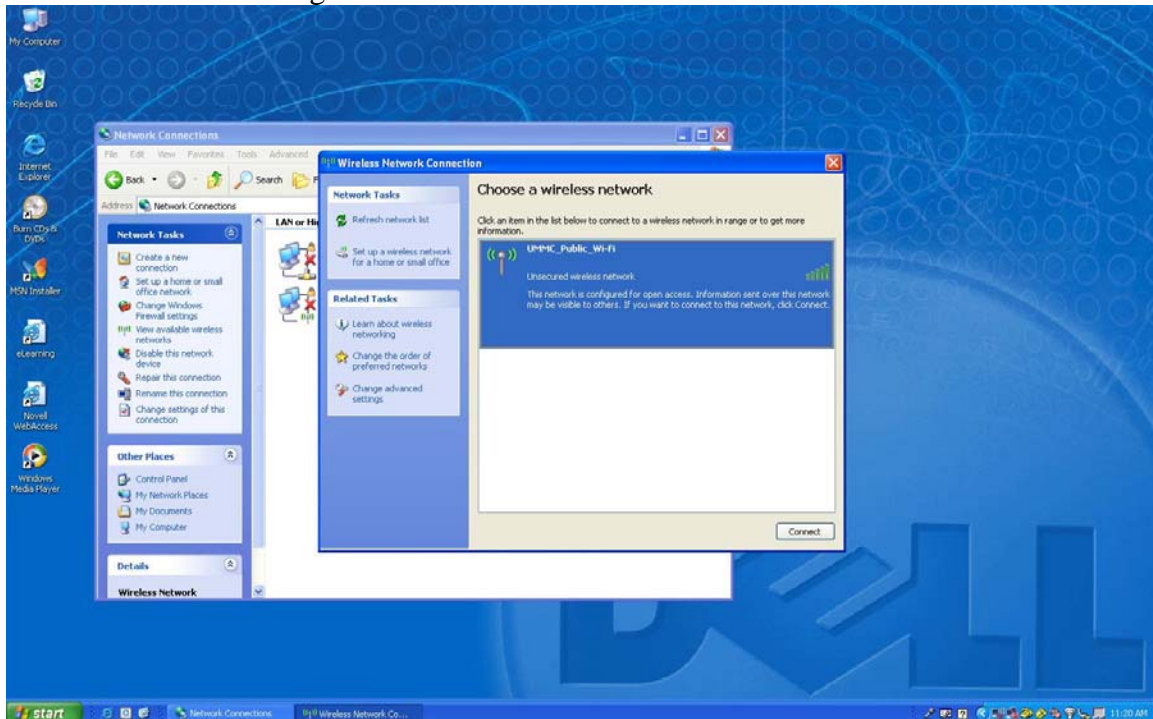

3. Click the Network Connections Icon.

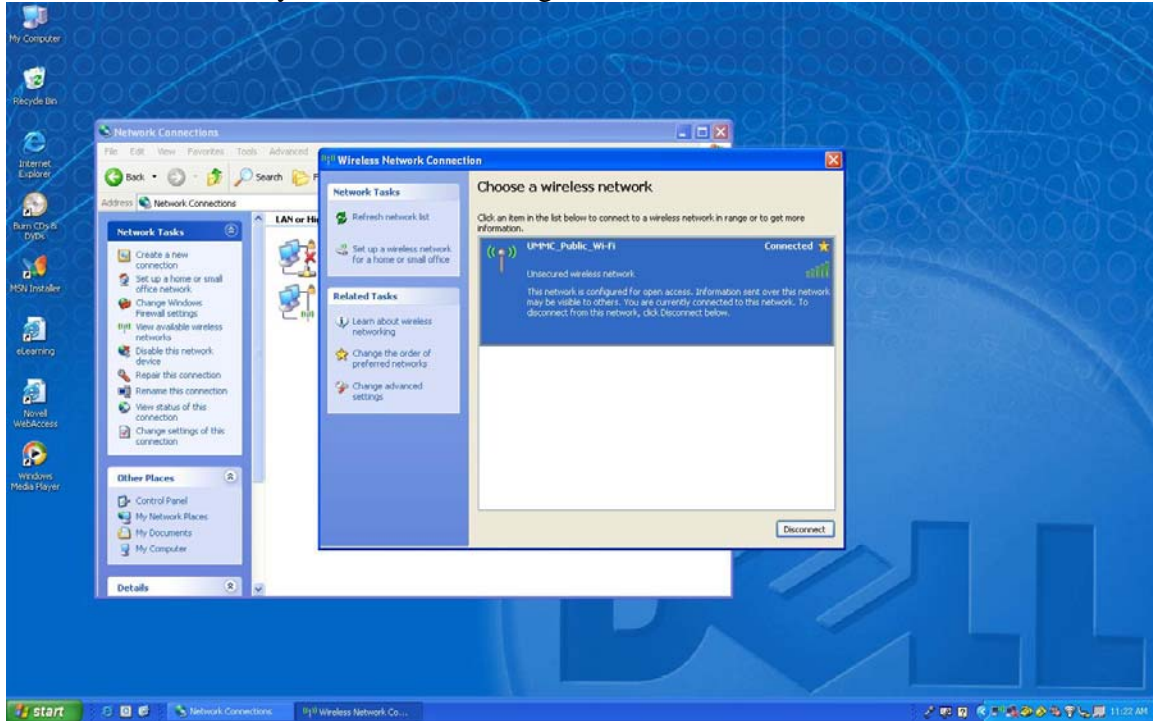

4. Using the right mouse button click on the Wireless Network Connection Icon. You will get a menu. Select View Available Wireless Networks.

5. In the list of available networks, click once on **UMMC\_Public\_Wi-Fi** and click connect at the bottom right of the screen.

6. Your Wireless card will now connect to **UMMC\_Public\_Wi-Fi**. In the list of available networks it should say connected to the right of **UMMC\_Public\_Wi-Fi**.

You are now connected to the UMC unsecured wireless network. Close the windows that you have open and you may begin browsing the Internet.
