

# Body Mass Index

## Facts:

Obesity may lead to:

- Diabetes
- Heart Disease
- Breast Cancer
- Stroke
- Hypertension
- Osteoarthritis
- Colon Cancer
- Kidney Disease

Americans are the fattest people in the industrial world.

- 55% are overweight
- Adolescent obesity has increased by 40%

## It's All About You!

Here's what you can do if your BMI is higher than 24.

- Make healthy food choices
- Fit exercise into your life
- Yearly checkups with your health care provider
- Keep follow-up appointments

*Know Your BMI*

**Are You too fat?**

**Is your weight making you sick?**

*We eat too much.  
We exercise too little.  
We never run out of excuses.*

## What Is Your Body Mass Index (BMI)?

*How To Determine Your Body Index.*

- Find your weight — read down
- Find your height — read across
- Find where they meet that is your BMI

If your height and weight aren't included

- Take your height & weight
- Multiply your weight by your height
- Divide by your height in inches twice.

What does your score mean?

If you have a BMI score of

24 or less — not much risk

25-29 Caution needed

>30 — Danger! YOU are at risk
